McCulloch announces our first electric saw, at our lowest price ever!

Mini Mac Electric

$99.95

Manufacturer's suggested list price

Why the biggest name in chain saws pulled a switch.

McCulloch has been making chain saws for 26 years now—the finest saws for professional, industrial, farm and home needs. In fact, we invented the super lightweight chain saw for home use. And now we've put all that experience into an electric saw—our first electric saw, at our lowest price ever.

Why? Because a gasoline engine saw may be more saw than you need. If you just want a saw for use around the house and yard, where electricity is easily accessible, our new Mini Mac Electric has many advantages.

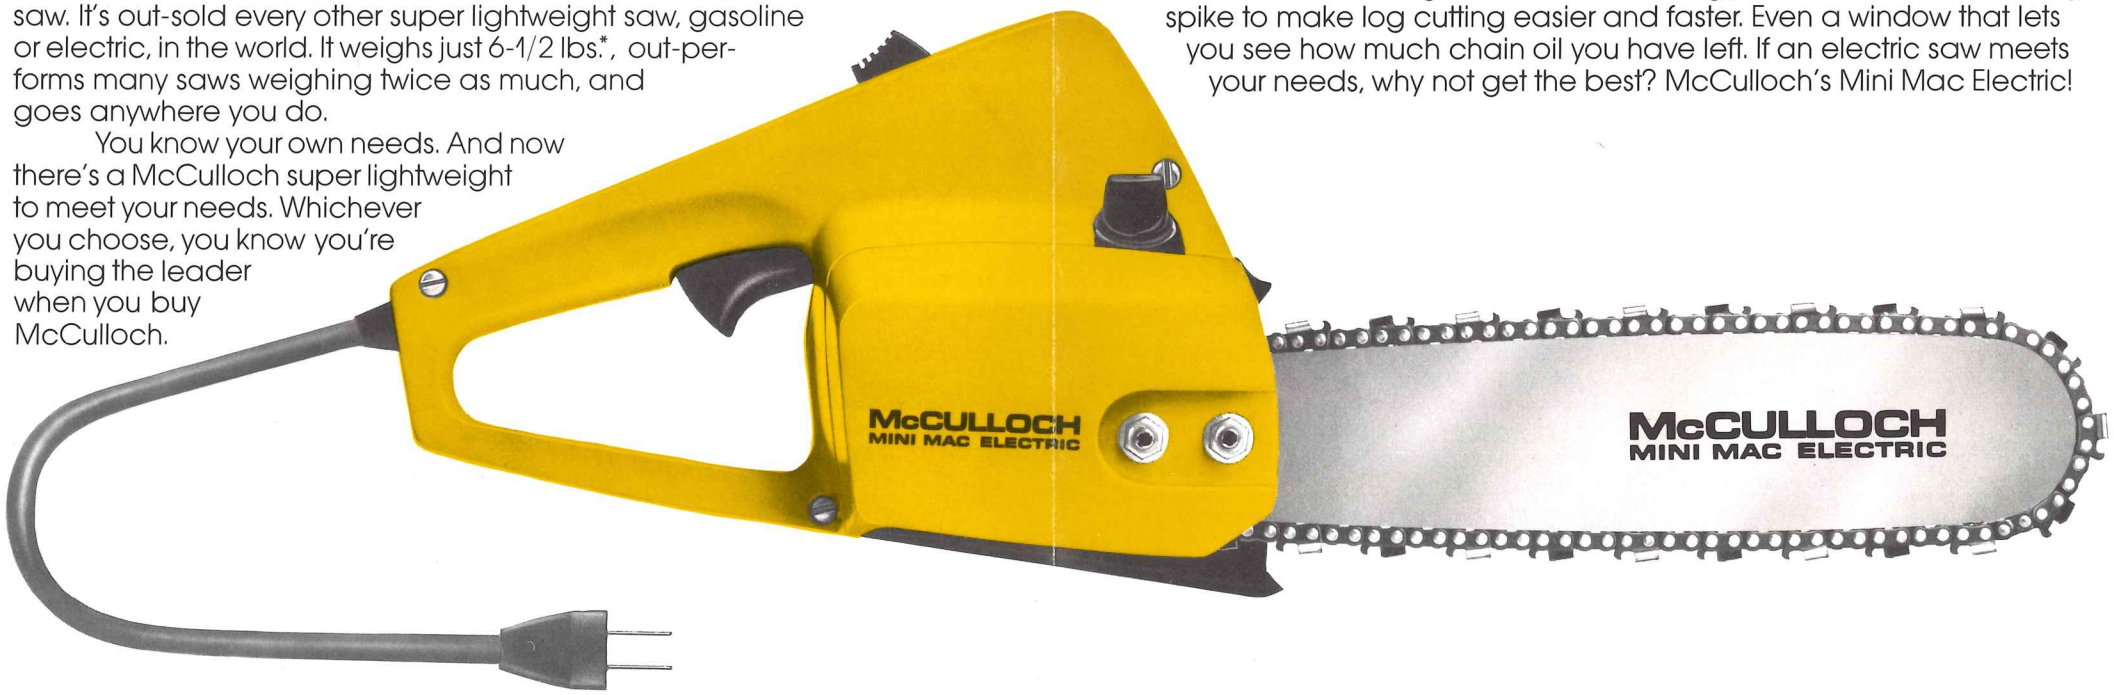
On the other hand, if you need a saw that goes anywhere—on camping and hunting trips, for farm, ranch or extensive yard work—take a look at our famous Mini Mac 6 gasoline-powered saw. It's out-sold every other super lightweight saw, gasoline or electric, in the world. It weighs just 6-1/2 lbs.*, out-performs many saws weighing twice as much, and goes anywhere you do.

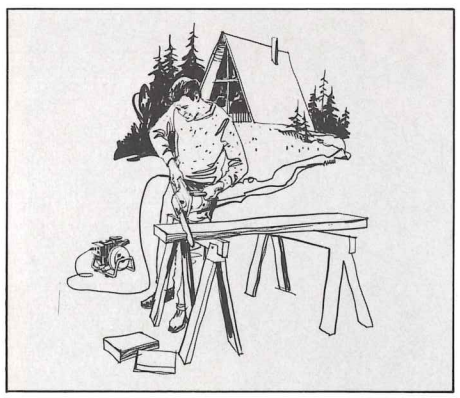
You know your own needs. And now there's a McCulloch super lightweight to meet your needs. Whichever you choose, you know you're buying the leader when you buy McCulloch.

Just plug it in and start cutting!

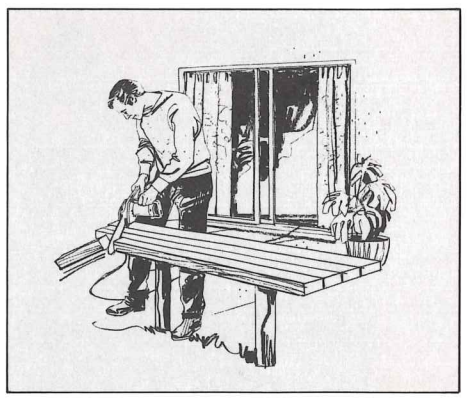
Our new Mini Mac Electric has the plug-in convenience of a household appliance. No fuel to store or mix. You can even use it indoors. You get minimum vibration and noise. It's as simple to operate and as reliable as an electric drill.

And look at these special McCulloch features! At only 7-3/4 lbs.*, the Mini Mac Electric is a true super lightweight, far lighter than most electric saws. The Lexan housing provides double insulation, so you don't need a special three-prong plug for grounding. As another safety feature, the saw can't be activated unless your hand is holding it in the proper position for cutting. And McCulloch invented this special chain, with teeth closer together, to give you extra-smooth cutting—a boon for building projects. There's a bucking spike to make log cutting easier and faster. Even a window that lets you see how much chain oil you have left. If an electric saw meets your needs, why not get the best? McCulloch's Mini Mac Electric!

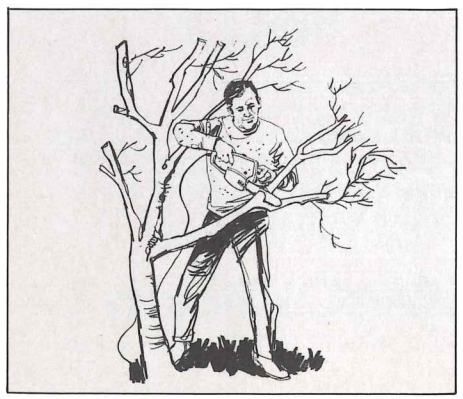




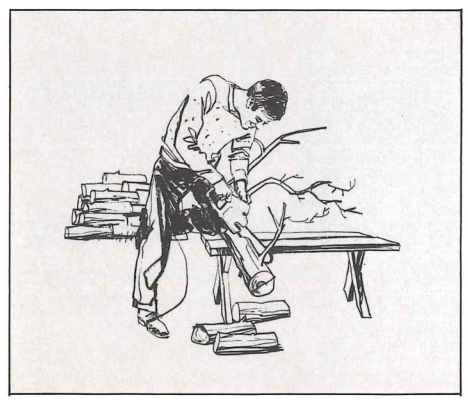
Plug in anywhere! Exclusive Lexan housing provides double insulation. You don't need a special three-prong plug for grounding.



Smooth cutting. Our special chain, with teeth closer together, gives smoother cutting for building projects.



Light weight means more maneuverability. Weighs only 7-3/4 lbs.*, so it's much easier to cut with and carry than most electrics.



Special safety features. Saw can't be activated until hand is holding it in proper position for cutting.

McCulloch Electric Saw Features and Specifications

Cutting Attachments	
Sprocket	9 tooth rim type
Chain	McCulloch Pro Mac 250 1/4" pitch
Chain Speed	Approx. 1100 FPM under load

McCulloch Chain, Bar and Sprocket Oil Special anti-wear formula can actually double chain life. Special "MOLY" additive gives extra lubrication protection during critical first seconds of cutting. Extra "tackiness" makes oil cling to chain at high speeds for better lubrication, less waste. Also contains new "anti-pitch" additive to keep cutting fast and smooth even in green, sappy wood.

McCulloch Gasoline Saws. Choose the Power to Fit Your Needs.

Mini Mac 6 and Mini Mac 6 Automatic. The Mini Mac 6 is the world's most popular chain saw—and no wonder! It weighs just 6½ lbs.* Yet it has the power to zip through a 6" log in 5 seconds. Factory equipped with 12" bar and chain. The Deluxe Mini Mac 6 Automatic has 14" bar and chain. Oils itself automatically as you cut, to extend the life of these parts.

Power Mac 6 Automatic. The only professional saw available in the 6-lb.* class. 35 cc (2.0 cu. in.) engine makes it powerful enough for tree service work, construction jobs, all-around farm use. Yet it's so light, it's perfect for home use as well. Oils its own 14" bar and chain as you cut.

Mac 10-10 Automatic. Over 3/4 million Mac 10 Series saws have been sold for farm, forest and home use. Rugged 55 cc (3.3 cu. in.) engine handles the toughest jobs with ease. Yet at 11-3/4 lbs.* it's still a true lightweight. Oils its own 16" bar and chain as you cut.
